# Inventing the future of Storage

# Agenda

- The evolution of global networking & its effect on storage
- Enabling storage growth
- Attributes & characteristics of network storage
- Hp's SAN strategy
- HP solutions
- HP SAN foundation software
- Questions

# global.networking

**1998:**  
the volume of  
Email in the US  
surpassed hand  
delivered mail!

**50M US computers  
connected to the WEB**

The % of Americans  
online has risen from  
14% to 41% in three  
years

**1998:**  
Business to business  
e-commerce =  
\$43 Billion

**1999:**  
\$24 Billion in  
e-commerce, with 700K  
websites

**2002:**  
the # of computers outside the US  
will more than triple

**2002:**  
\$1T trillion in goods & services will  
be traded on the internet

**2003:**  
> 1M e-business  
websites

**2003:**  
Consumer-only  
e-commerce = \$75B

**2003:**  
Business-b business  
e-commerce =  
\$1.3 trillion

**Online Stores: More  
than 25% of  
transactions never go  
through**

# better.managing.the.heap

**Will my storage environment scale?**

- Planned downtime for re configuration
- Storage is private to server

**What are the cost drivers?**

- Poor management of capacity
  - Spares
  - Copies

**Will I have the resources?**

- Staff efficiency out of balance with growth & availability of staff

## Benefits of SANs

- Storage pools
- SAN backup

- Pooled spares
- Shared files

- Order of magnitude improvement in management efficiency

Application	Industry	Avg. Hourly Cost
Brokerage	Finance	\$6,450,000
Credit Card Auth.	Finance	\$2,600,000
Home Shopping (TV)	Retail	\$113,000
Airline Reservations	Transportation	\$89,500
Tele-ticket sales	Media	\$69,000
Package Shipping	Transportation	\$28,000

20-50% Spares  
??? Copies

Environment	Efficiency (GB/person/yr)
Highly Distributed	30-100
Centralized.	100-500
SAN	500-1000+

hp property

# attributes.of.san.storage

<u>Attribute</u>	<u>Feature</u>	<u>SAN provides</u>
Persistent	Protects itself	Transparent backup
Zero Impedance	Infinite Bandwidth	Multi-path-multi pipe
Elastic	Expands itself	Policy driven volume management
Mobile	Moves itself	Policy driven data movement
Innocuous	Plug-n-play	Hot configuration
Visible	Public	Asset and data sharing, mirroring
Safe	Secure	Secure access methods
Always On	Available & dependable	Hot configuration, redundancy, replication, multi-path and pipe
Economic	Efficient	Maximize pooling, minimize spares & copies
Automated	Labor Free	Policy driven and self-managed

# characteristics.of.a.san

<u>Characteristic</u>	<u>Capability</u>
Open	Multiple-vendor Multiple- product
Interoperable	Multiple-OS Multiple-storage types
Manageable	Well behaved heterogeneity

# the interoperability challenge

<b>Business Application</b>	Messaging	Order Entry	Imaging		
<b>Storage Application</b>	Data Bases	Printers			
<b>Storage Resource Management</b>	Backup	Remote management			
<b>OS</b>	WIN	Solaris	UNIX AIX		
<b>Host</b>					
<b>HBA</b>					
<b>SAN Fabric</b>					
<b>Storage</b>					

# hp's.san.strategy

## Systems & Network Admin

Compatible with all frameworks & systems

## SAN Admin & Data Management

Manage the storage independent of the infrastructure, device and vendor

## Provide Storage & Infrastructure

World class HP storage & partners

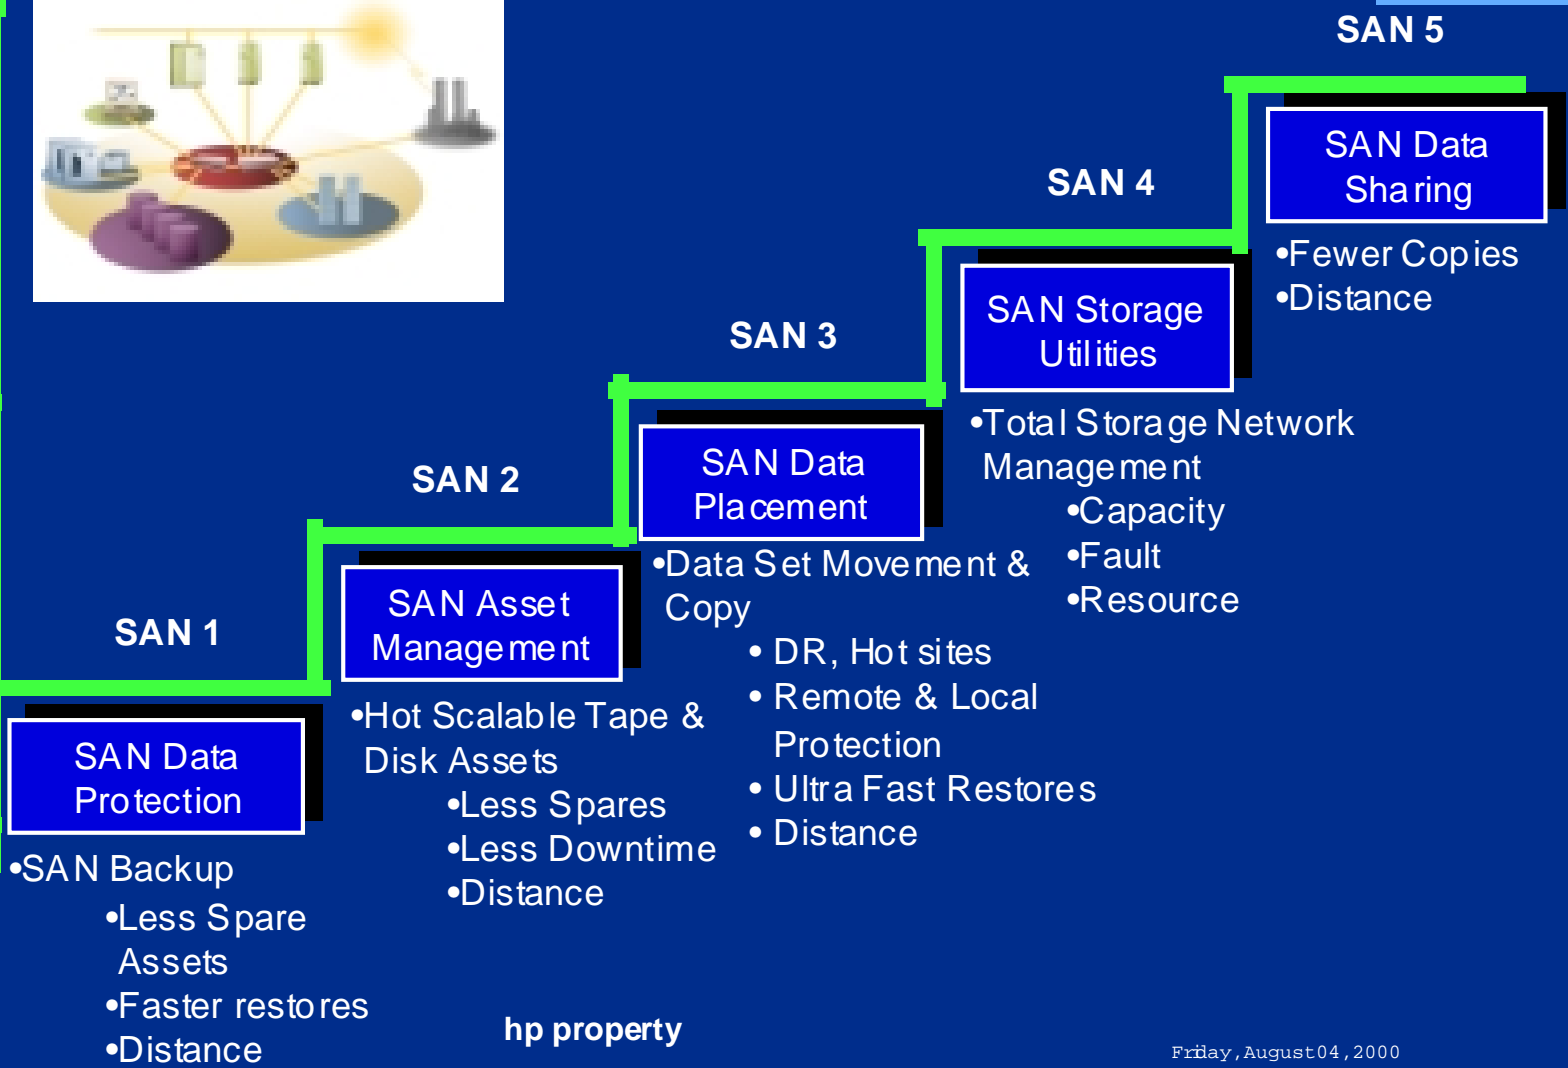

# hp.san.solutions

100 TB per Storage administrator **10000**

1 TB per Storage administrator **1000**

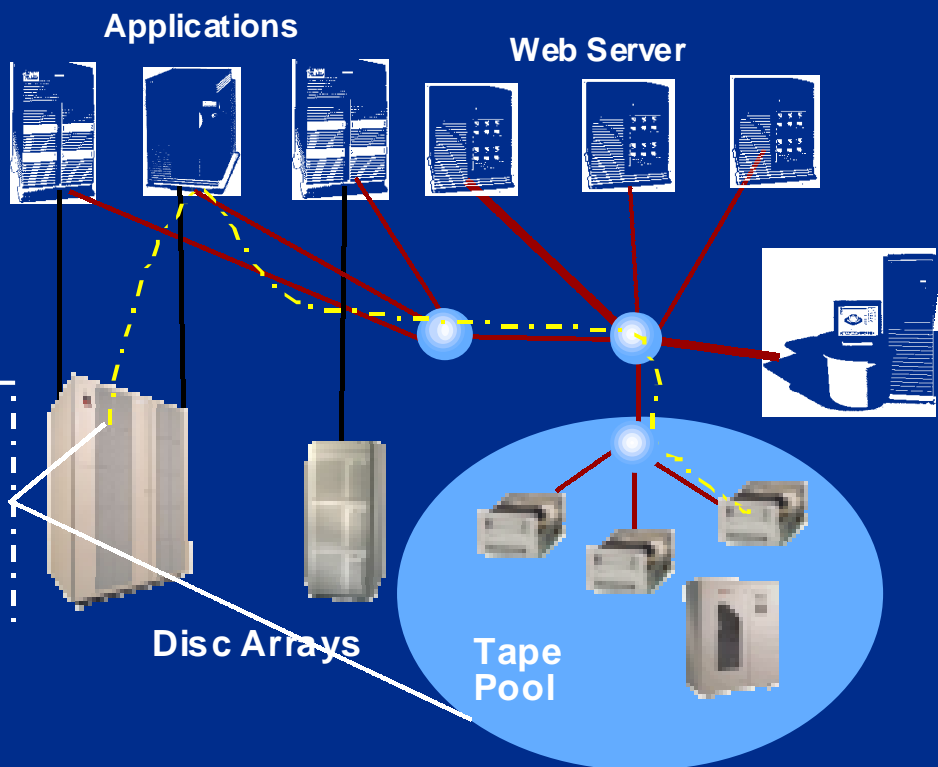

100's GB per Storage administrator **100**

# SAN 1: Data Protection Blueprint

- Storage Applications:
- Popular backup apps.
  - Library Server
  - Library Management
  - Fabric Management
  - Device Management

- Feature:
- SAN data movement
  - Tape drive Pooling

# SAN 2: Asset Management Blueprint

- Storage Applications:
- Popular backup apps.
  - Library Server
  - Library Management
  - Fabric Management
  - Device Management
  - Lun Management
  - Path Management

# SAN 3: Data Placement Blueprint

## Storage Applications:

- Popular backup apps.
- Library Server
- Library Management
- Fabric Management
- Device Management
- Lun Management
- Path Management
- **Data Movement Management**

## Feature:

- Integrated Tape-disk San
- Peer-peer move & copy

# SAN 4: Storage Utilities

Feature:  
 • Policy based elastic storage

- Storage Applications:
- Popular backup apps.
  - Library Server
  - Library Management
  - Fabric Management
  - Device Management
  - Lun Management
  - Path Management
  - Data Movement Management
  - **Capacity Management**

# SAN 5: File Sharing

## Feature:

- Multi-application access to single file

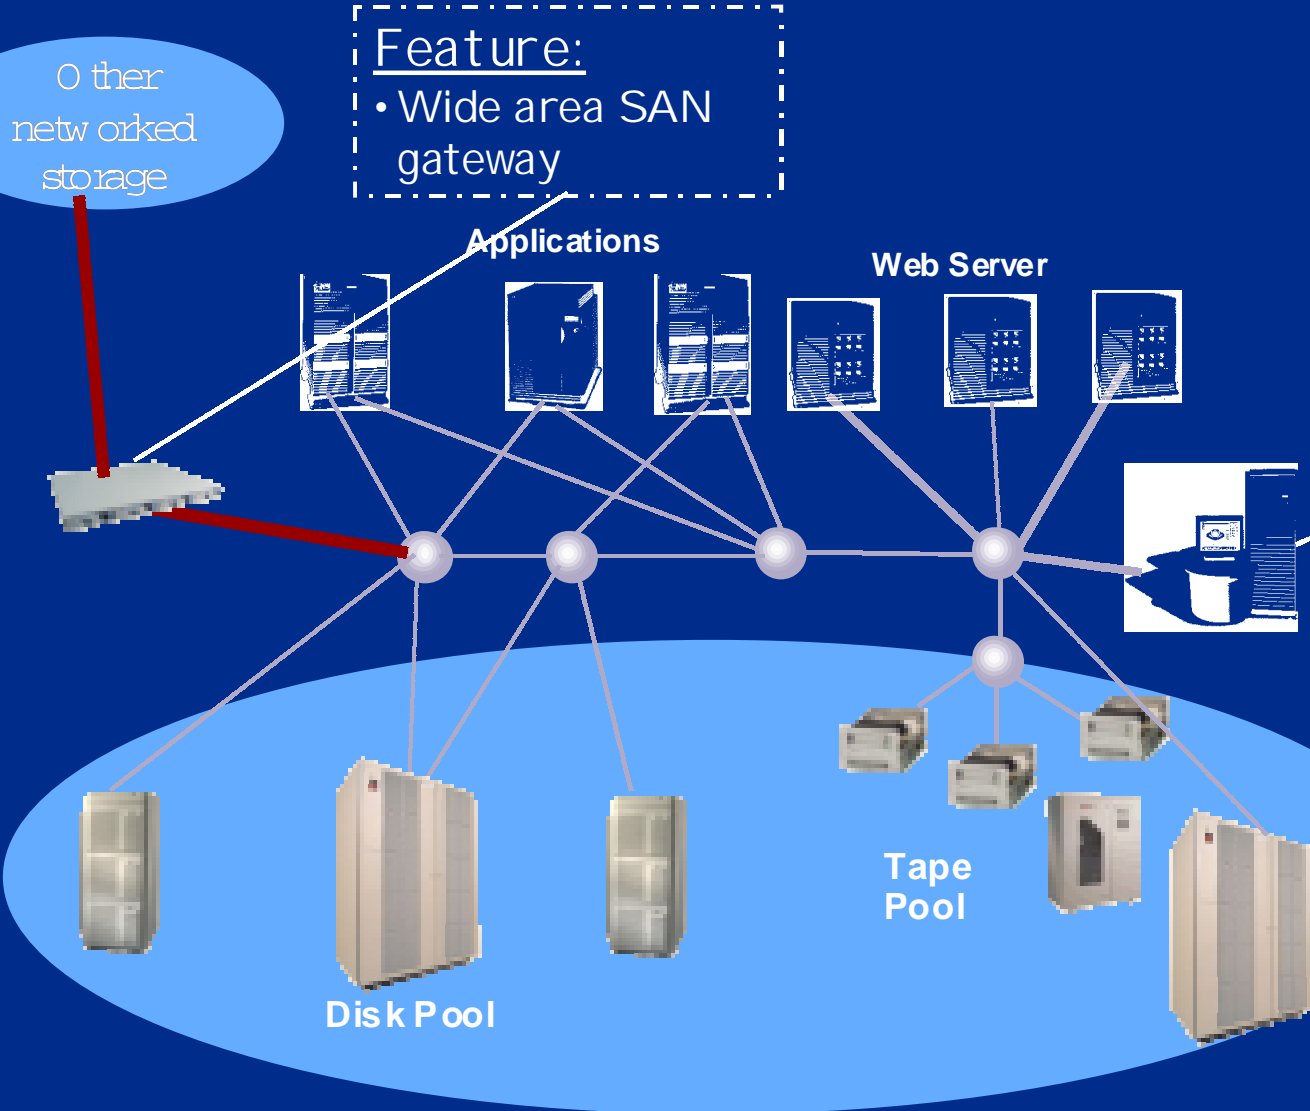

## Storage Applications:

- Popular backup apps.
- Library Server
- Library Management
- Fabric Management
- Device Management
- Lun Management
- Path Management
- Data Movement Management
- Capacity Management
- **File Sharing**

# SAN n: Extended Range

Feature:

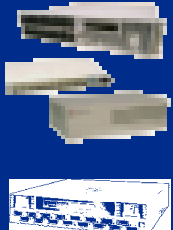

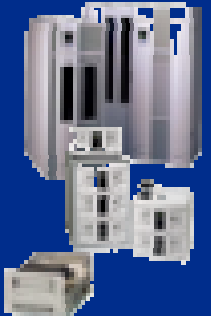

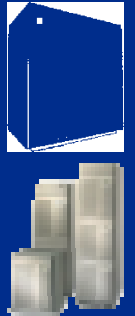

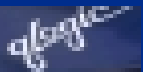

- Wide area SAN gateway

- Storage Applications:
- Popular backup apps.
  - Library Server
  - Library Management
  - Fabric Management
  - Device Management
  - Lun Management
  - Path Management
  - Data Movement Management
  - Capacity Management
  - File Sharing
  - Remote Access Mgr.

# san.management.foundation

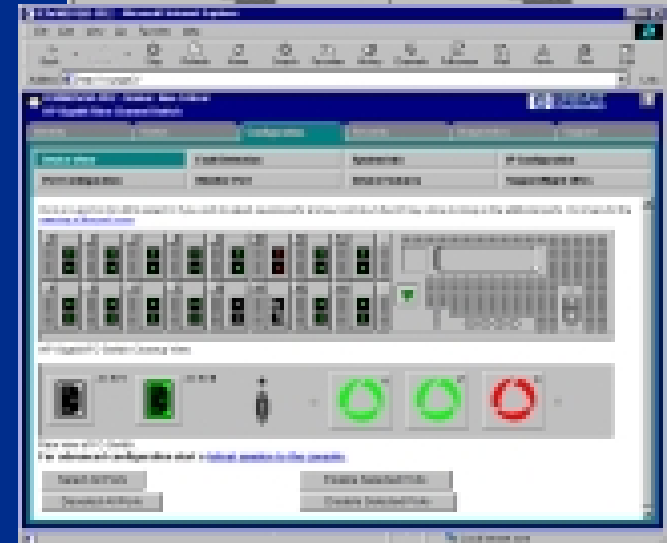

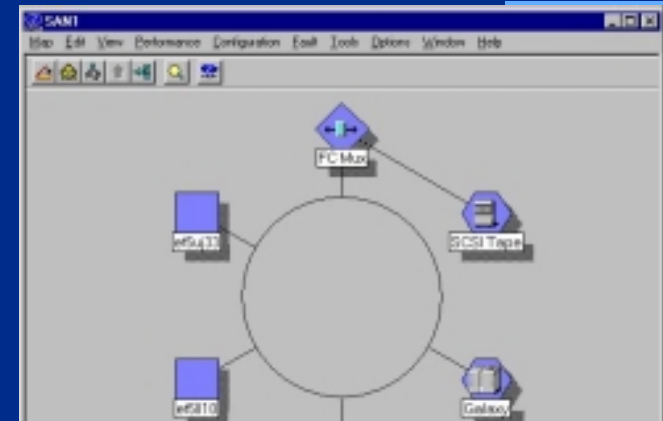

# HP SAN Manager Device Mgmt.

## Benefits

- **Reduces the complexity** of managing high availability data resources.
- **Improves availability** by centrally managing and monitoring critical data resources.
- **Reduces IT resource costs** by providing consistency in the management of data center storage devices

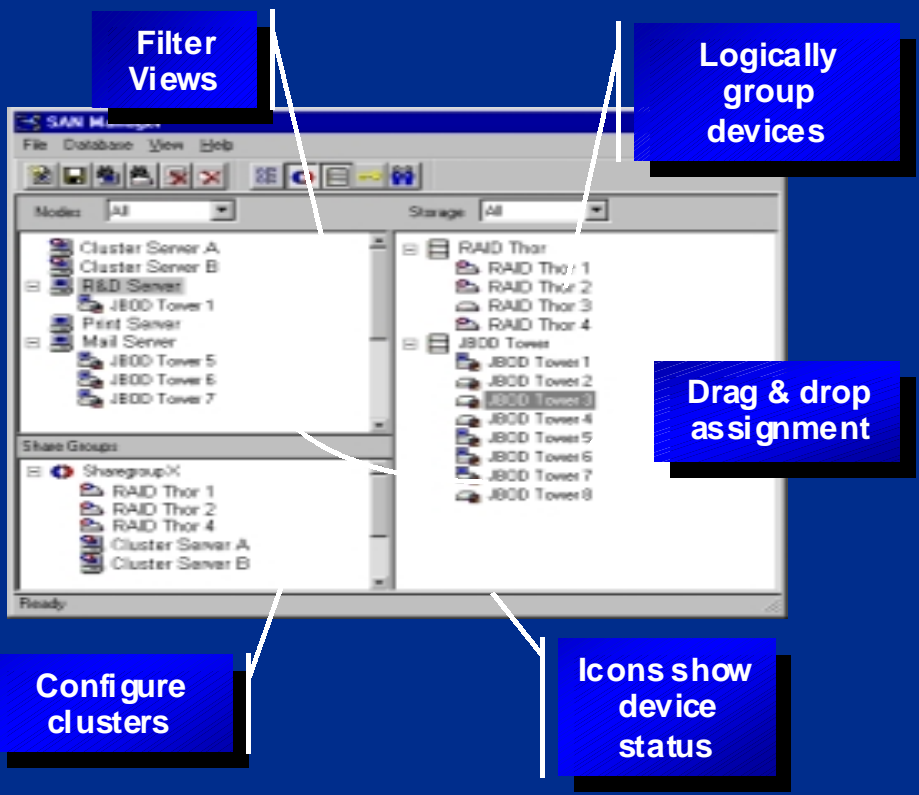

## Features

- **Discover, map** and create a topology for the connected storage devices
- **Monitoring and online configuration** of SAN devices through web browser technology
- Based on market-leading **HP OpenView Network Node Manager** technology

# HP SAN Manager LUN Mgmt.

## Features

Hardware independent, Open system, Centralized SAN management solution, with an Intuitive Drag & Drop GUI, and Storage configuration without reboots

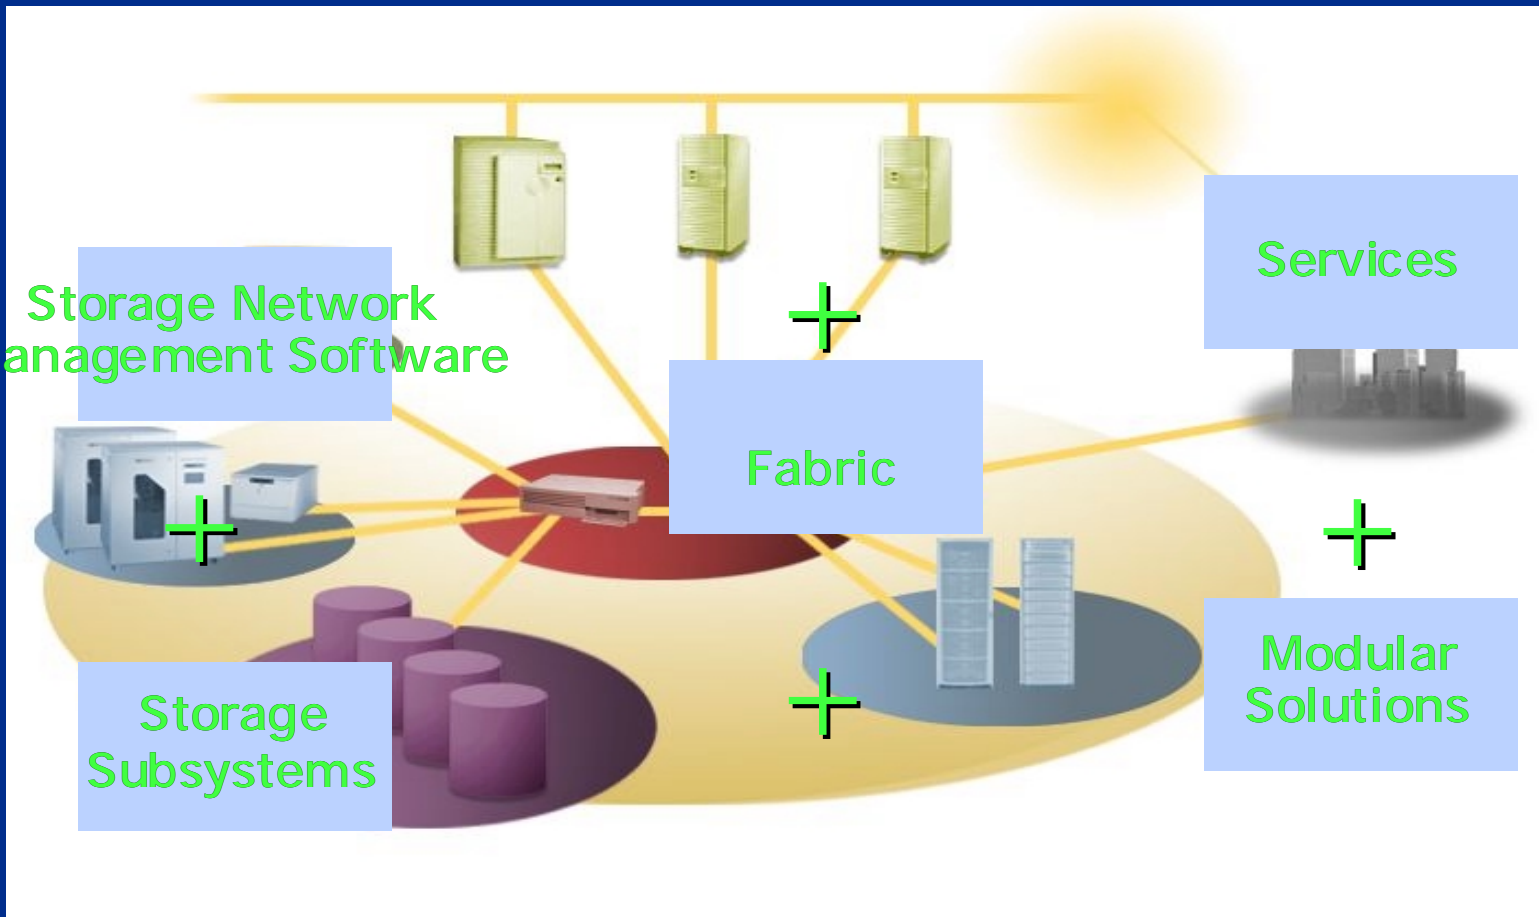

## Benefits

Secures SAN storage assets, Increases system availability and Dramatically decreases overall storage management cost

# Equation is our vision for.....

## A Simpler, Better Behaved, Scalable Network Storage Environment

# Inventing the future of storage!
