CustomerNeeds& Problems

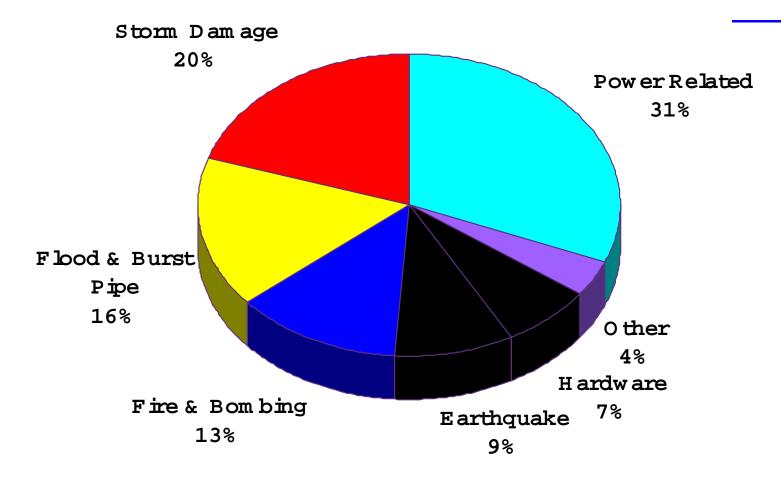

Whyworry about business continuity?

- Legal implications
- Audit requirements
- Regulatory requirements
- Competitive advantage
- Public image
- Reduced market share
- Decreased customer loyalty
- Damaged branding
- Company survival

Almost 80% of businesses that suffer a serious disruption and have not planned appropriately, will cease trading within 18 months of the event.

Leading Causes of Computer Downtime Over 12 Hours

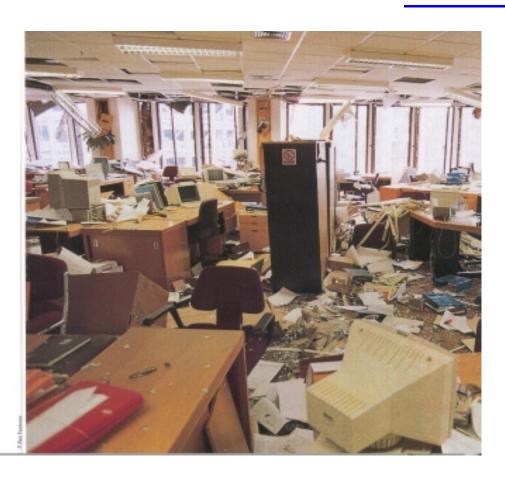

Based on 6,000 Case Studies Researched Since 1982 Source: Contingency Planning Research, Inc. 2/27/97

W hatelse could happen?

TERRORIST BOMB

becomet Make to an esplosion which ripped through the World. Trade Centre yesterday raceuing killing of least underground our park six and injuring which links the two transcords of people. The explosion is besiding The explosion demapt.

The explosion is towers of the \$16-storey estimated to have is the most behalf caused \$500m of terrestat attack in New "43% of the companies affected by the bomb at the World Trade Centre in New York in 1993 went out of business."

N evertheless...

- Only 45% of all Fortune 500 enterprises have formal business contingency plans.
- Of these only 12% are considered effective enterprise-wide.
- 55% have experienced disruptions resulting in loss of systems for >1 hour, 11% for >24 hours or more.

HP'sApproach

HP'sApproach

Module 1: BUSINESS-TO-IT ALIGNMENT

Understand what the recovery requirements are to support critical business operations.

Determine appropriate level of investment.

MANAGEMENT

Module 4: OPERATIONAL

Activation of the plan according to the situation.

Ensure plan is regularly rehearsed, updated, and reviewed.

MANAGING AVAILABILITY

Module 2: SOLUTION DESIGN

Translates the recovery needs of the organization into recovery strategies and structure.

Module 3: DEVELOPMENT & DEPLOYMENT

Creation of the continuity plan to support critical business needs of the organization.

Solutions: Products & Services

Business-to-IT A lignm ent

- Determining implications, tangible and intangible, to business if an outage or disasterwas to occur.
- Identifying risks and exposures.
- Defining maximum amount of to lerable downtime.
- Determining critical business units.
- Defining the appropriate level of investment for protection.

HP Consulting: Business Im pactAnalysis

HP Consulting: Risk Analysis

Solution Design

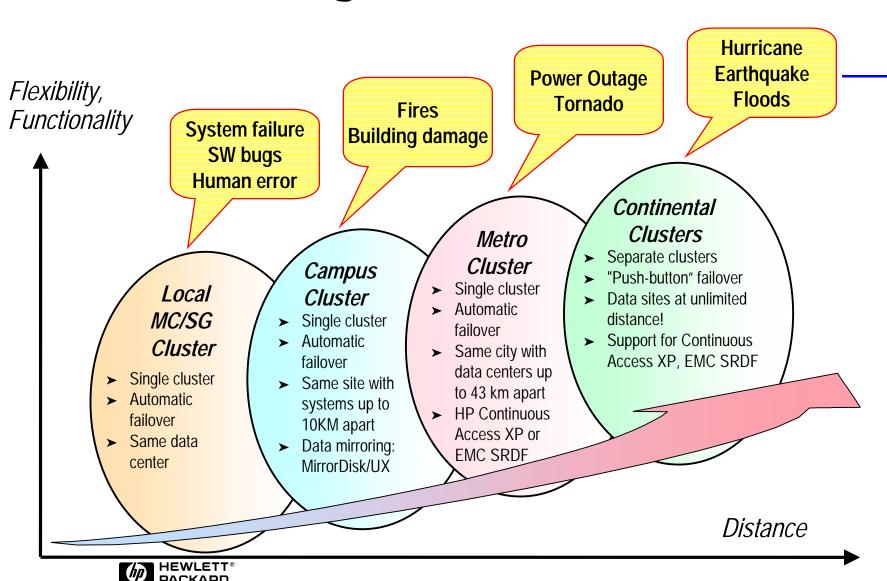

- Translates business needs into recovery strategies and plans.
- Provides infrastructure to support defined business goals.
- Identifies the processes, plans, technology, and services required to m in imize downtime and loss.

HP Consulting: Recovery Strategy Definition

HP Consulting: Technical Infrastructure Design

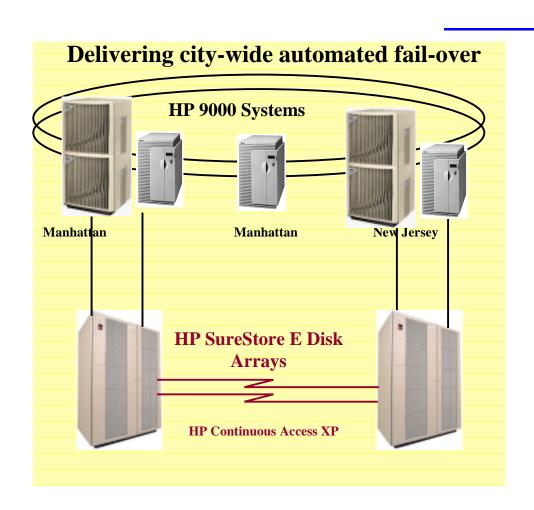

HP's FullRange Disaster Tolerant Solutions

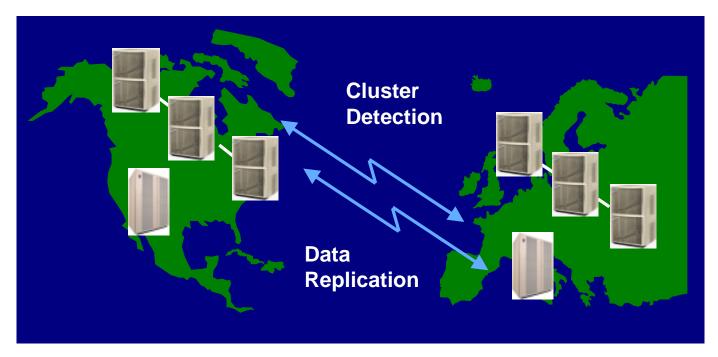

M etroC lusterw ith Continuous A ccess X P

- Protect against Tornadoes, Fires, Floods
- Rapid, automatic site recovery without human intervention
- Effective between systems that are up to 43km apart
- Provides very high cluster performance
- Backed by collaborative implementation, training and support services from HP
- Also available: MetroCluster with EMC SRDF, using EMC Symmetrix Disk Arrays

World-Wide Data Protection with HP Continental Clusters

- Highest levels of availability & disaster to leance
- Reduces downtine from days to minutes
- Locate data centers at econom ically and or strategically best boations
- Trans present plications and data

- Push button faibveracross 1000s of km
- Supports num erous wide area data replication tools for complete data protection
- Com prehensive Supportand Consuling
 Services as wellas Business Recovery Services
 forplanning, design, support, and rehearsal

Development& Deployment

- Im plem ent the infrastructure
- Contingency and workaround plans
- Recovery procedures
- Interim processing procedures
- "Return-to-Normal" criteria and procedures

HPConsulting: Plan Design & Development

HP Business Recovery Services

Flexible Recovery Service Offerings

- -Recovery Centers
- -Ship-to-Site Hardware
- -M obile Data Centers
- -Office Recovery Facilities
- -BRS Net

Coverage

-Hew lett-Packard is one of only two global recovery vendors

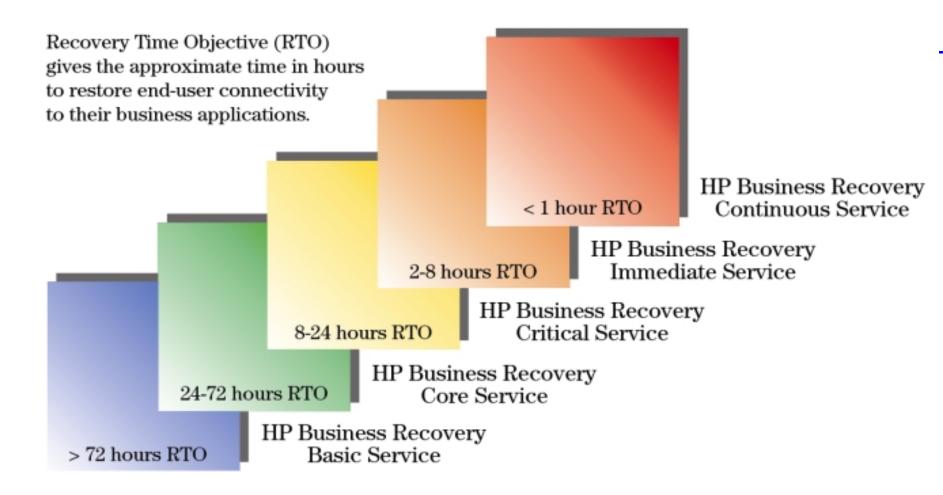

Facilities

- -28 Data Recovery Centers
- -10 Satellite Recovery Facilities
- 80 ffice Recovery Centers (plus Mobile Offices)

HP's Spectrum of Business Recovery Services

Operational M anagement

- Rehearsals
- Plan invocation
- Plan updates
- Post-disasterm anagem entprocedures
- Change m anagem entprocess
- On-going training

HP Consulting & BRS: Plan Rehearsals

HP Consulting: Plan Audit

HP Products & Services

Module 1: BUSINESS-TO-IT ALIGNMENT

- HPC Business Impact Analysis
- HPC Risk Analysis

Module 4: OPERATIONAL MANAGEMENT

- HPC Plan rehearsal
- BRS Solution Rehearsal
- HPC Plan updates and reviews
- HPC Change management

MANAGING AVAILABILITY

Module 2: SOLUTION DESIGN

- HPC Review backup alternatives for strategic solution
- HPC Plan methodology and design
- MC/ServiceGuard, MetroCluster, ContinentalClusters
- HPC Technical Solution Design

Module 3: DEVELOPMENT & DEPLOYMENT

- HPC Plan development
- HPC Technical Solution Implementation
- BRS Recovery solution (Basic, Core, Critical, Immediate, or Continuous)

W hy HP?

- 14 years experience in providing D isaster R ecovery and Business Continuity solutions to our clients.
- We combine our comprehensive set of worldwide capabilities, service and products to best meet your specific needs.
- We use a proven methodology the same one we use internally!
- <to receive IDC quote from George>

Case Studies

Case Study: E-Commerce

Environment: high visibility, high volume, high impact.

Problem: Cannot sustain longer than 1-2 hours of maximum

downtime.

HP Solution: HP Consulting Business Im pactAnalysis

HP Consulting Plan Design & Development

BRS Continuous using ContinentalClusters

Data Replication

HP Consulting Training & Rehearsal

Case Study: M anufacturing Site

Environment: Using SAP, customer can sustain amaximum of 12

hours of downtime.

Problem: Must minimize downtime and interruption.

HP Solution: HP Consulting Business Im pactAnalysis

HPConsulting Plan Design & Development

BRS Critical (12 hours)

M C ServiceGuard

HPConsultingRehearsal

Case Study: Telco (IP Billing)

Environment: Client can sustain a maximum of 48-72 hours of

downtime; low probability of regional disasters.

Problem: Regulation requires a backup and recovery plan be

in place.
