

The OpenView integration advantage

Milan Hanson

R&D Program Manager

HP OpenView Solution Alliance Program

The OpenView integration advantage

There is no doubt that developers who build manageability into their applications and solutions will have more success -- and business. In today's environment IT professionals have a lot to manage, including multiple networks, diverse applications, servers, clients, and vendors. Solutions that enable them to monitor, investigate and resolve problems in multi-platform, multi-product environments are essential. Attend this session to learn more about what HP OpenView is doing to simplify the developer's challenge, how best to take advantage of its "single pane" management capabilities, and how to design for OpenView manageability.

objectives

- understand why manageability matters
- be aware of what OpenView contributes to manageability
- be able to articulate a high-level design for an OpenView integration that improves your manageability
 - built-in manageability
 - “after the fact” manageability
