The GAP

Problem: *There is a class of business processes for which the lack of information is a bottleneck.*

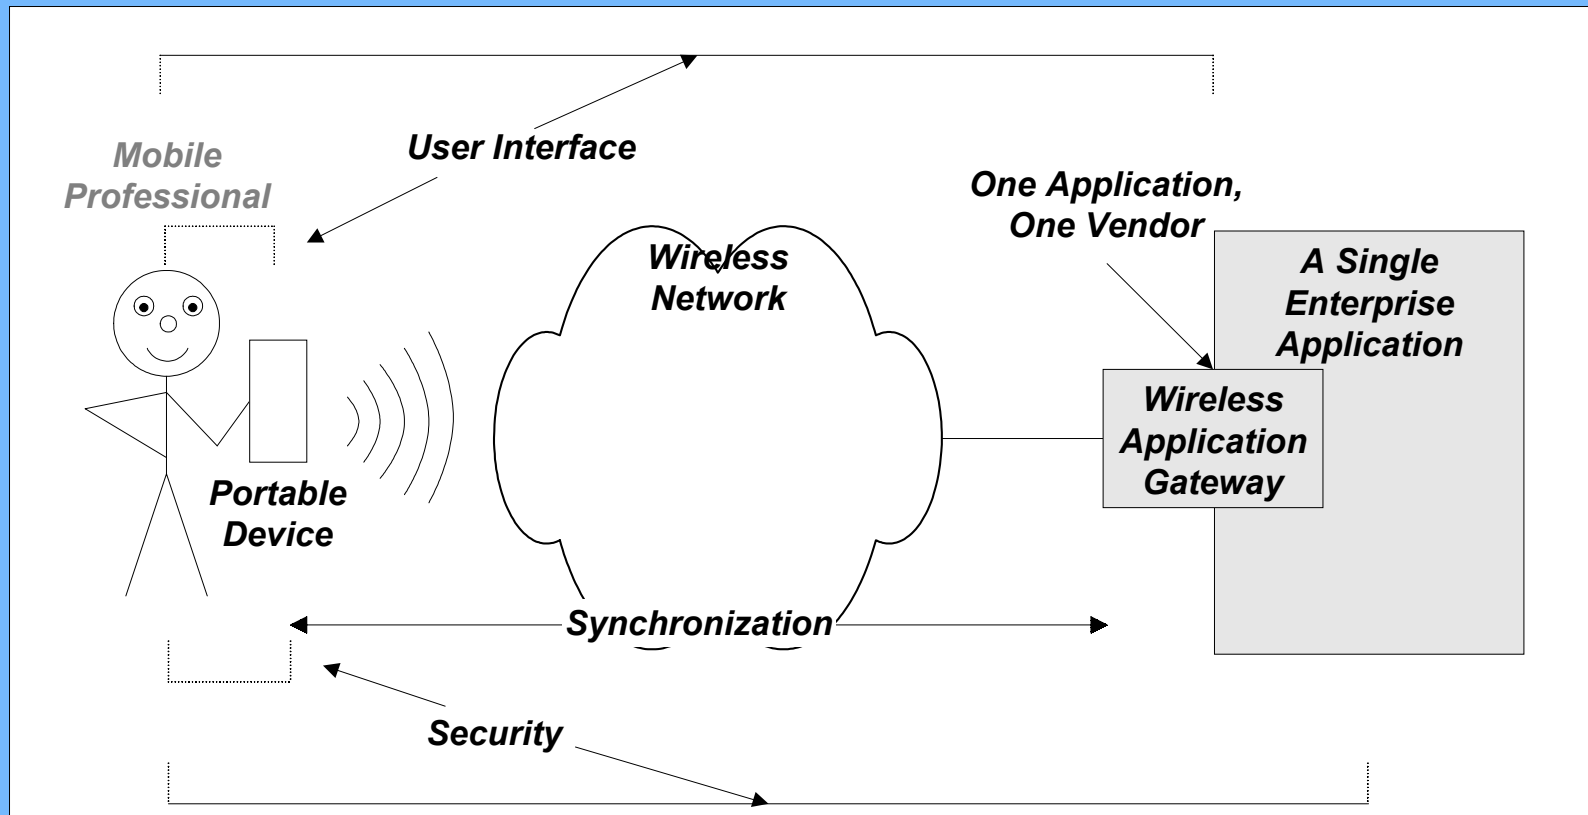

Closing the Gap

Solution: *The building blocks to close the gap between mobile professionals and critical information are ready to be put in place.*

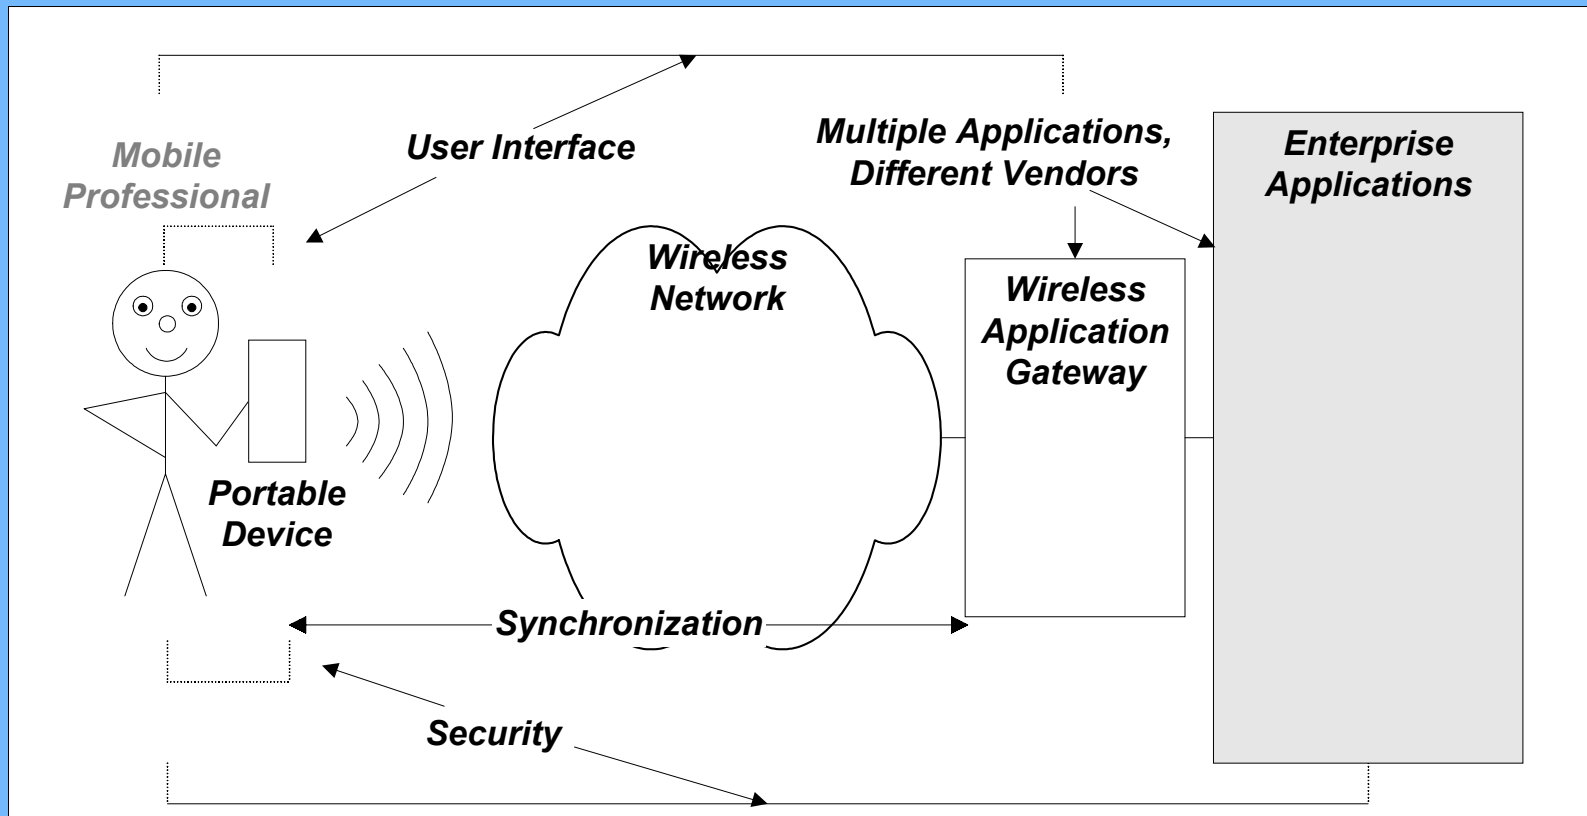

Closing the GAP

Solution: One way of arranging the building blocks is to add wireless application gateway functions to enterprise applications.

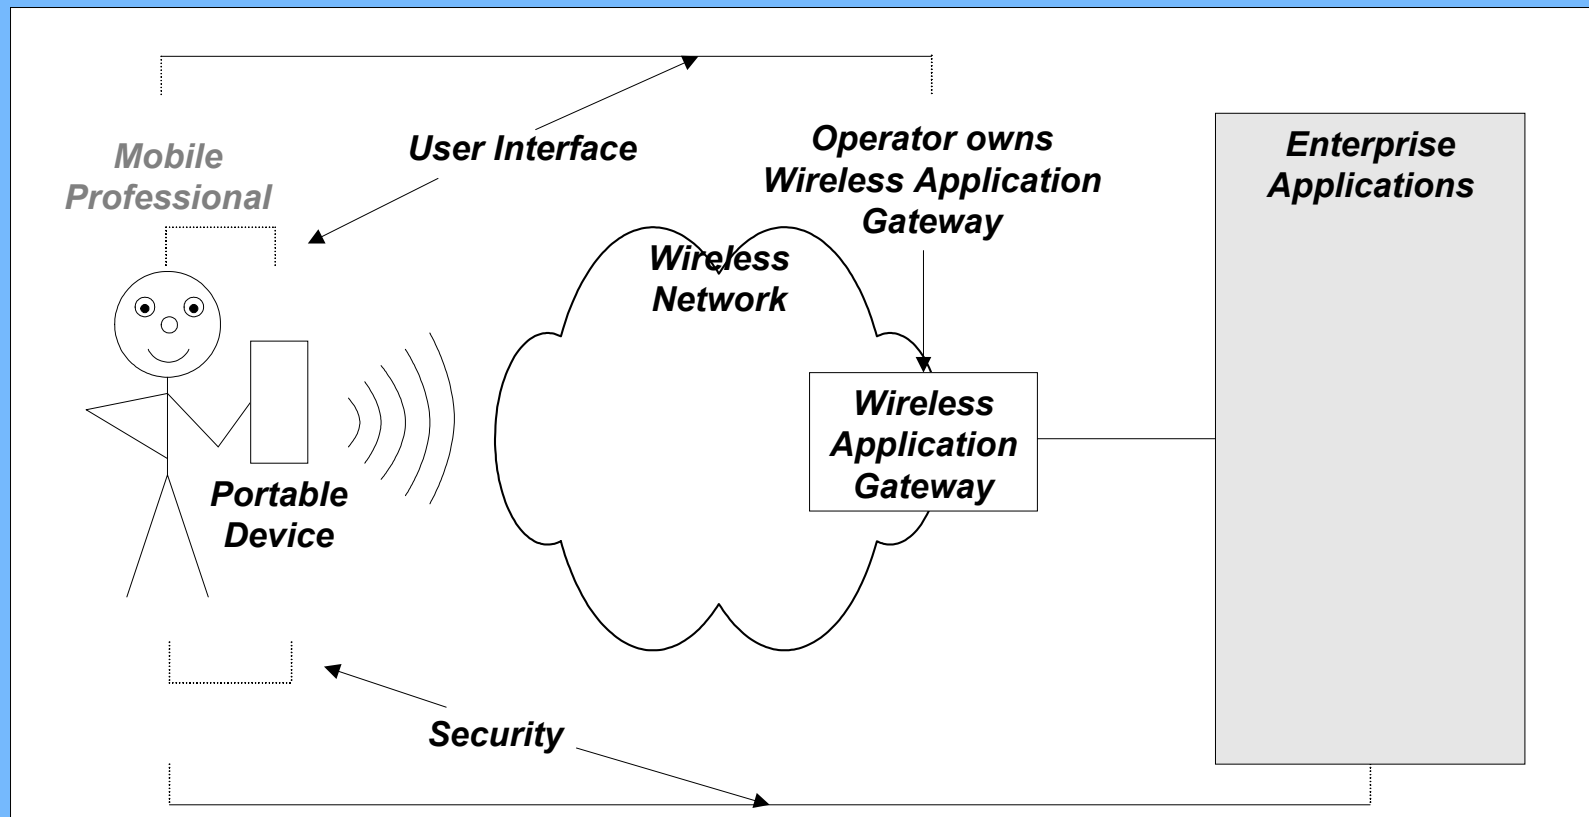

Closing the GAP

Solution: *Another way is to keep the wireless application gateway as a separate component enabling access to several applications.*

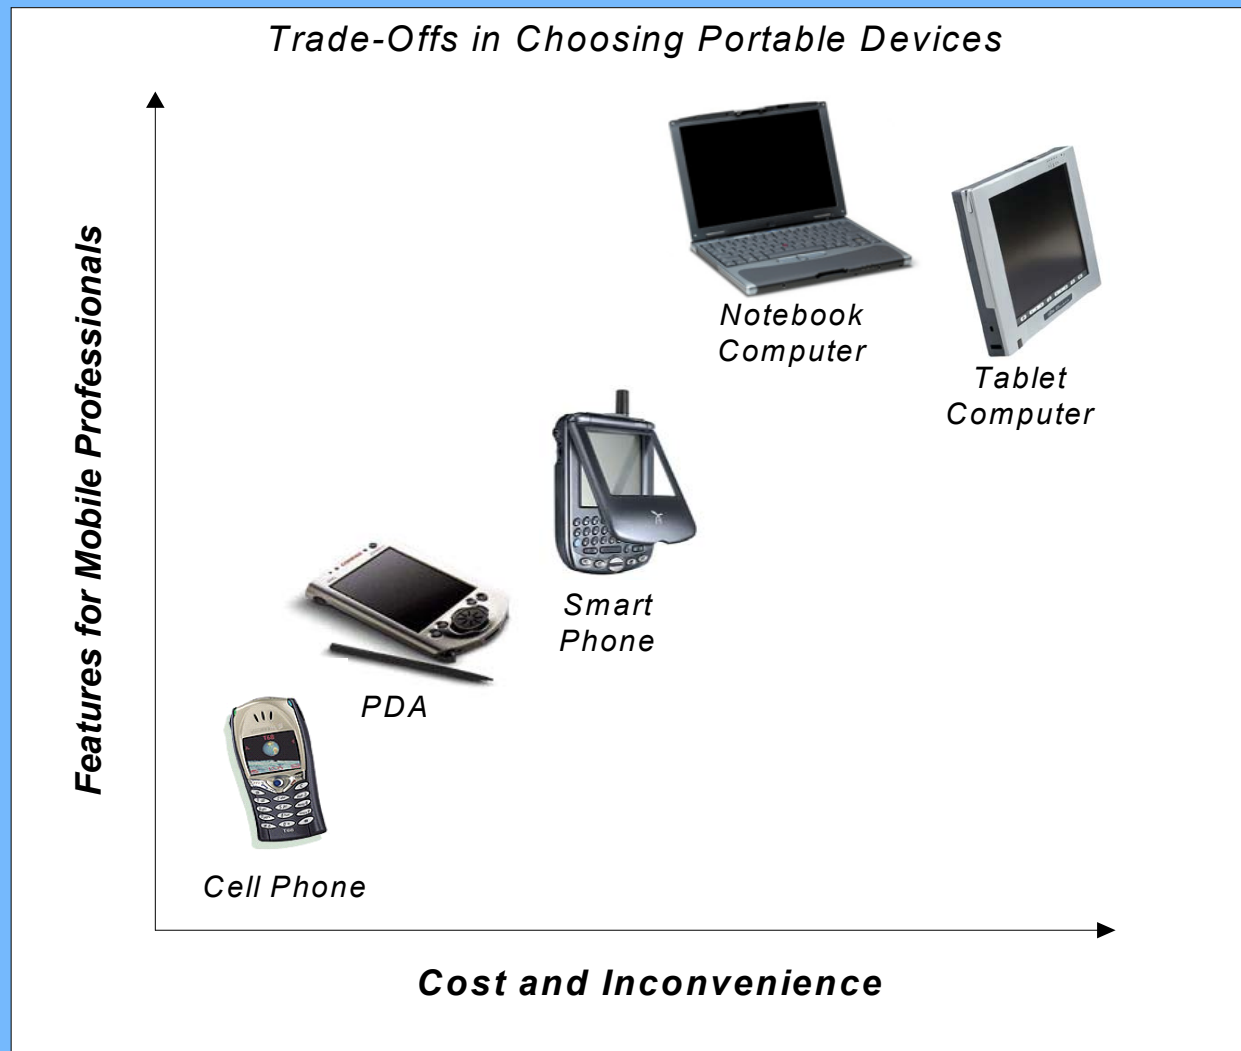

Closing the GAP

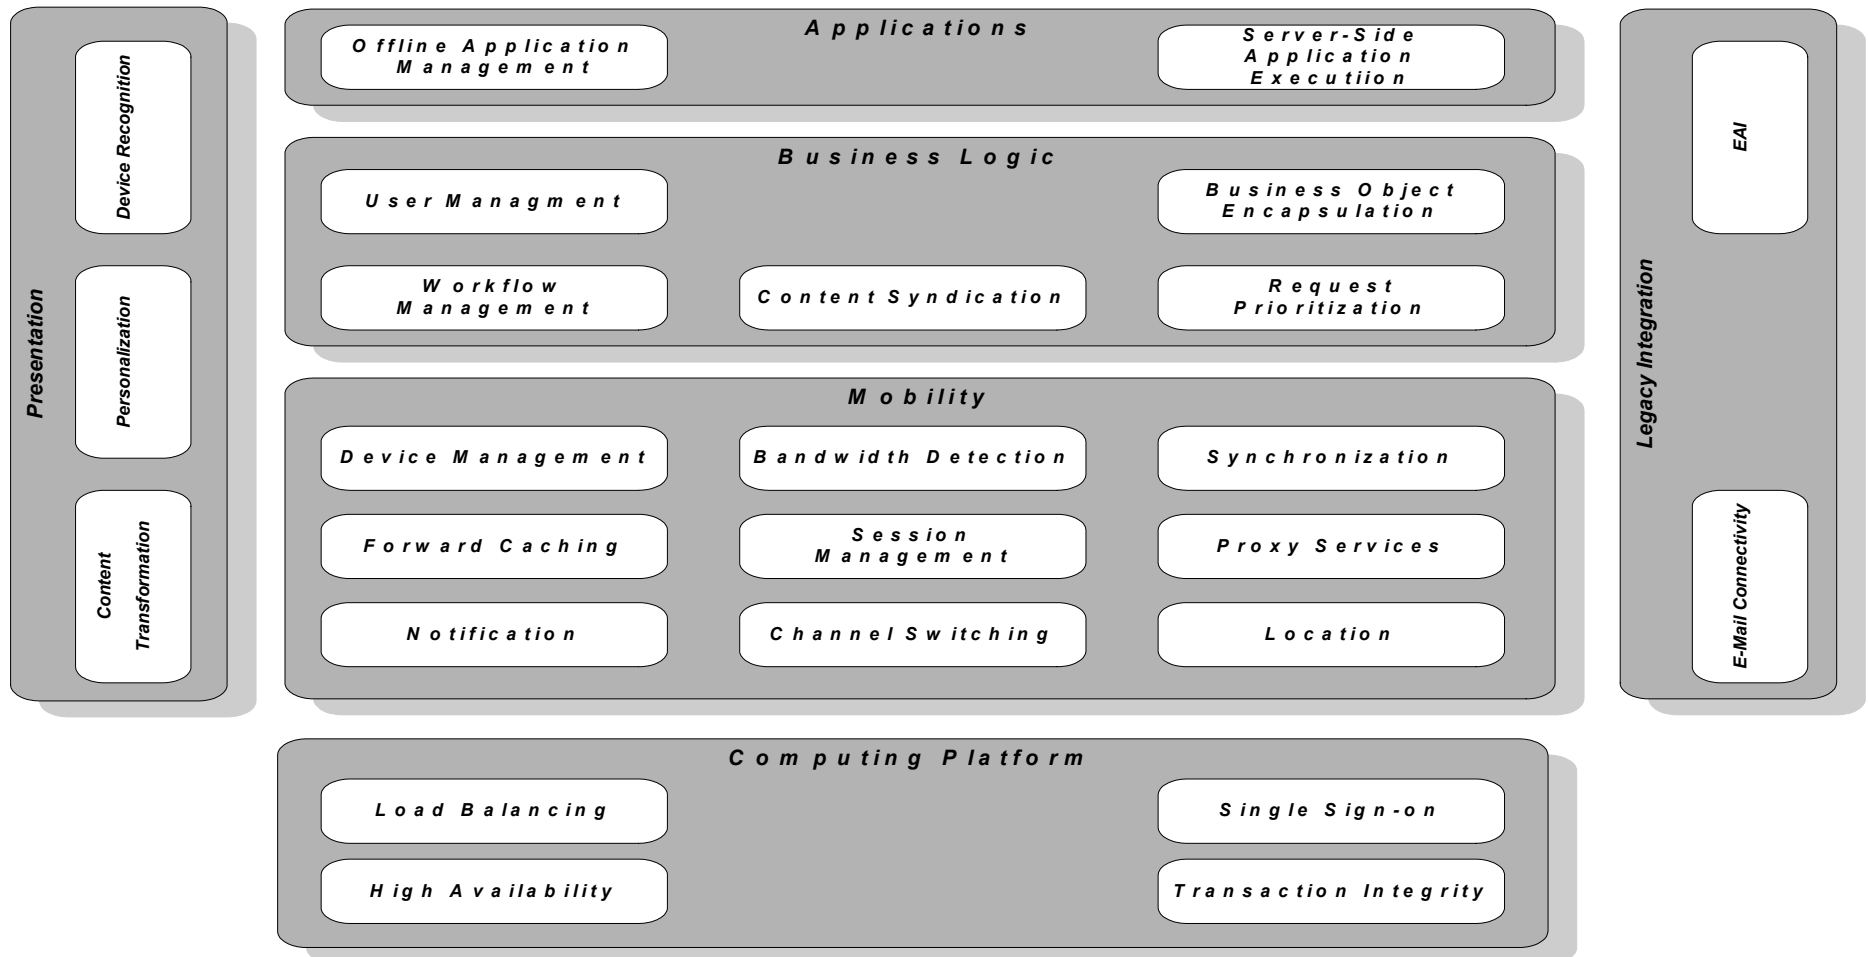

Solution: *The wireless application gateway might also sit on an operator network to provide a subscription service to enterprises.*
