The one Net vision

Novell Nterprise™

The best foundation for your mixed environment. Novell Nterprise is an innovative family of products which give you the power to enable and manage the constant interaction of people with your business systems— regardless of who they are, where they are or what time of day it happens to be.

Nterprise Linux Services Overview

Novell Nterprise Linux Services is a suite of **enterprise-ready** software which allows organizations that are **embracing Linux** as an OS strategy to economically **replace Windows** servers and **extend** traditionally **‘NetWare’ services** to the Linux platform without losing functionality.

Which Linux Distribution?

Two primary options at this time:

- SuSE
- RedHat

First release of Novell Nterprise Linux Services will be certified on SuSE Linux Enterprise Server and RedHat Enterprise Linux

- Novell will *support* the Novell services on both distributions.

All subsequent Novell products/solutions will be certified and *supported* on market leading Linux Distributions

Product Definition Novell Nterprise Linux Services

A suite of enterprise-ready services for the Linux early adopter.

| | | | |
|---|--------------------------------|----------------------------|---|
|  | Identity Services | eDirectory w/DirXML | eDirectory and DirXML with connectors to eDirectory, NT Domains, and Active Directory. Web address book w/search and self-administration. |
|  | File Services | iFolder | Personal file management - anywhere, anytime access; automatically synchronize files between your PCs; backup your data; internet security. |
|  | Print Services | iPrint | Support IPP standards-based printing for Windows, Mac and Linux clients. Using web-based maps, users can quickly find and install printers. |
|  | Messaging Services | NetMail | Standards-based messaging and calendaring supporting 50,000 users per server. Web and Win32 client included. |
|  | Web Experience | exteNd | Director Standard Edition - Unified web access experience with gadgets to all Nterprise Linux Services. Use Tomcat and a Java Virtual Machine. Include exteNd and MySQL for ISVs. |
|  | Management Services | ZENworks | Software package distribution (Red Hat Package Manager or RPM) via the Tiered Electronic Distribution (TED) functionality of ZENworks for Servers. |
|  | Install Services | RPM | Server-based install with Express and Custom options. Express installs all services on a single server. Custom supports distributed environment deployments. Text based and fully scriptable. |
|  | Administration Services | iManager | Browser-based single point of administration for all Novell Nterprise Linux Services. |

Identity Services

Business Challenge: How can I manage user access and rights to network resources across network, platform and application boundaries?

Solution: 'Identity Services' is a complete Identity and authentication infrastructure for your end-users, business partners and customers.

Novell Training Services has developed a certification strategy around Nterprise Linux Services.

Strategy: Leverage existing industry accepted training for the prerequisite knowledge (LPI Certification) as preparation for specific training and certification based on Nterprise Linux Services.

The Novell Certified Linux Engineer (CLE)

Novell Training Services

Novell Developer Services

Novell Forge - A technology collaboration site that allows incremental involvement in the OSS development community.

- <http://forge.novell.com>

Provide contributions to the OSS community

- Identify products or API's to open source
- Provide code and support it for and with the community (Structural Bazaar)

Open Source Review Board - Internal OSS education/advocacy and legal control.

Provide guidance, tools, and training to facilitate the support of Linux across Novell solution suites.

Novell Consulting Services

Novell's Ngage Teams' capabilities provide complete Linux-based and Services Oriented Architecture solutions

You need solutions
to your business problems

Direction Setting

"identifies and roadmaps implementable solutions"

Implementation

"develops, integrates, deploys and supports the process, organizational and technical components of the solution"

Project Management

"Directs, coordinates and monitors activities to keep the project on track to deliver value"

Client Empowerment

"assists and empowers your staff to implement, operate and extend the solution"

Analyst View

“IDC’s demand-side research has indicated that Linux faces several impediments to mainstream acceptance including lack of Linux expertise and experience in the organization, an organizations ability to integrate Linux into their network, and issues with ongoing support of Linux environments. Novell’s move to expand customers’ options and support Linux is likely to go a long way towards resolving these issues in the minds of IT decision-makers in many organizations.”

Dan Kusnetzky, vice president of System Software research for IDC

Novell Press Release - 24 June 2003

“META Group believes the strategy of porting NetWare’s capabilities to a Linux core is a good move, and Novell should accelerate the schedule”.

Novell and Linux: Setting the Record Straight

Earl Perkins - 23 April 2003

Partner View

“We are pleased to see Novell introduce offerings to help customers meet the need for fully supported, advanced network services and functionality on Linux. We believe in the value these offerings will bring to a growing number of IBM customers. In order to deliver that value to our customers, IBM is working with Novell on this release and subsequent enterprise releases to make Novell Nterprise Linux Services available to customers across the IBM eServer product line.”

Jim Stallings, general manager of Linux at IBM

“Red Hat welcomes Novell Nterprise Linux Services running on the Red Hat Enterprise Linux family of products. With Novell’s services, supported by Novell’s worldwide support organization, running on Red Hat Enterprise Linux, customers now have even more reasons to look to Linux for their mission-critical infrastructures. We look forward to working with Novell and our common global OEM partners - Dell, HP and IBM - to deliver robust solutions to the market.”

Mike Evans, Vice President of Channel Sales, Red Hat

“Novell has much to offer the Linux market with its innovative technology and established support infrastructure. The synergies between Ximian and Novell will help drive enterprise adoption of Linux by providing customers with cost-effective solutions that are easy to deploy and affordable to manage.”

David Patrick, President and CEO of Ximian

Customer View

“BT believes Linux will play an increasingly important role in our IT environment in the future. We welcome the addition of the Novell contribution to the Linux space, and the additional choice this will enable. We feel it is a good thing for the industry and for Novell.”

Chris McGarr, Technology Strategy Manager, BT

“Novell is approaching the Open Source Community, and soon it will offer its customers NetWare along with Linux. On the customer side, Novell will earn points, and will certainly get acceptance from the business community. I would like to congratulate Novell for its sound business decision. At present, MLP is approaching the Linux topic from the server side, and is therefore very pleased with the strategic line followed by Novell. MLP was and is sticking with Novell and will be even more now in the future.”

Dr. Stockmann, MLP, Heidelberg

The one Net vision

one Net: *Information without boundaries...where the right people are connected with the right information at the right time to make the right decisions.*

Summary

- With this move, Novell meets the needs of its customer base and the marketplace by providing compelling, supported services on both NetWare and Linux, the fastest growing platform in the market today.
- This move is further proof that the Novell one Net vision, which sees open cross-platform computing as the future, is valid and timely.
- Current Novell customers paying maintenance now have both a NetWare and a Linux option going forward
