

# Stupid DCL Tricks\*

[\\*with apologies the Kevin G Barkes](#)

## Chicago HPworld 2004, Thursday

```

10) Conditional execution                                sdt.may94
$ IF_DEBUG == " "
$ IF_BEN == " "                                     ! in systartup_v5/vms .com
$ IF_HOSS == "!"
.
.
.                                     ! in systartup_common.com
$ IF_DEBUG WRITE SYS$OUTPUT "Mounting Disks."
$ IF_BEN  MOUNT/SYST/CLUSTER $3$DUA0 SNAPSHOT0N /NOASSIST
$ IF_HOSS MOUNT/SYST/CLUSTER $3$DUA1 SNAPSHOT1 /NOASSIST
.
.
$ ! but, won't work
$ 'IF_BEN  VOL_LBL = F$GETDVI("$3$DUA0", "VOLNAM")
$ 'IF_HOSS VOL_LBL = F$GETDVI("$3$DUA1", "VOLNAM")
$ DCL :== " "
$ DCL PRINT ! gets default behaviour                No 9
Allen Rueter                                     internet: allen :) artsci.wustl.edu
at the time : Mallinckrodt Inst. of Radiology; now at Computing Technology Services
Washington University
