Release Documentation

Since the last release of OpenMail, the release documentation has been rationalized. The aim of this is to provide a consistent, cohesive set of documents which reduce the duplication of information and are more user-friendly and accessible.

The release documentation now comprises:

- **AT A GLANCE** - An overview of the release (this document).
- **FOCUS ON** - Detailed product and release information. For Release 6.0 there is a separate Focus on document for the server, drivers and connectors, web clients, Windows, Motif and Apple Macintosh clients, internet client protocols, and integration tools.
- **CLNOTES** - Detailed client server network information
- **OMNOTES** - Detailed installation and configuration information (for

example, kernel parameters), last minute product changes, and known problems and limitations.

General Description

OpenMail is the leading business messaging and collaboration system for UNIX. This exciting release of OpenMail delivers many new features to provide the best solution in its class, with the lowest total cost of ownership. Highlights include:

- enhanced high-end business scalability with the new Parallel Queue Architecture for improved mail throughput;
- native Internet and Web support, including new Web client 6.0, lynchpin of [OpenMail Anywhere](#), the secure, browser-based solution;
- improved UNIX server support for Microsoft Outlook;
- unrivaled legacy interoperability.

For detailed descriptions of the enhanced and new components included in this release, see the *Focus on* documents.

Release 6.0 Server Enhancements

- [OM Servers B.06.00 for HP-UX, IBM, Sun Solaris and Linux](#)

License and Third-Party Support Requirements

In order to use OpenMail you need to purchase OpenMail Mailbox Licenses (P/N B2016BZ). To use HP Clients, you need to additionally purchase HP Client Licenses (P/N B2020BZ). To use OpenMail Application Link, you need to purchase Application Link Client Licenses (P/N B2029BZ) and OpenMail Mailbox Licenses.

HP OpenMail Licenses**Mailbox Licenses**

The following clients require only "OpenMail Mailbox" licenses:

- OpenMail POP3 Access
- OpenMail IMAP4 Access
- OpenMail Administration Client for Microsoft Windows
- AdvanceMail/TI

Client Licenses

The following HP GUIs require "OpenMail Mailbox" Licenses and "HP Client" Licenses:

- OpenMail Client for Microsoft Windows
- OpenMail Client for Apple Macintosh
- OpenMail Motif Client for HP-UX
- OpenMail Motif Client for Sun Solaris
- OpenMail Motif Client for IBM AIX
- OpenMail Motif Client for Linux
- OpenMail Mobile Client for Microsoft Windows
- OpenMail Mobile Client for Apple Macintosh
- OpenMail Web Client

Application Link Client Licenses

To use Application Link you will require an "Application Link" client license (B2029BZ) and an "OpenMail Mailbox" license (B2016BZ). You will need sufficient Application Link client licenses and mailbox licenses for the maximum number of applications that will be signed on to OpenMail at any one time. Application Link licenses are supplied individually for each concurrent instance of each application used.

In addition, to use the Assured Delivery Service feature of the Application Link Server, you will require an additional Application Link Client license and one mailbox license for each instance of this service. The Assured Delivery Service ensures messages are delivered in the order in which they were sent.

Microsoft Client Licenses

To use the Outlook MAPI Service Providers for OpenMail customers will require:

- B2016BZ - "OpenMail Mailbox" license from HP
- B2275BZ - OpenMail Outlook driver license (pack of 50 licenses to use) from HP, plus
- the appropriate outlook client license which may be purchased from Microsoft.

Lotus Client Licenses

To be able to use the Lotus cc:Mail R6 client (OpenMail Edition), customers will require

- B2016BZ - "OpenMail Mailbox" license from HP
- B2274BZ - OpenMail cc:Mail R6 driver license (pack of 50 licenses to use) from HP, plus
- the appropriate client license which may be purchased from Lotus:
 - cc:Mail for Windows R6
 - cc:Mail Mobile for Windows R6
