Use of Outsourcing Increasing *Changing the Nature of Organizations*

OpenMail®

“The Virtual Corporation”

Beware...

OpenMail[®]

- ◆ **Opinions changing about the extent of outsourcing**
- ◆ **May not happen at all for many large companies**
- ◆ **There are alternatives...**

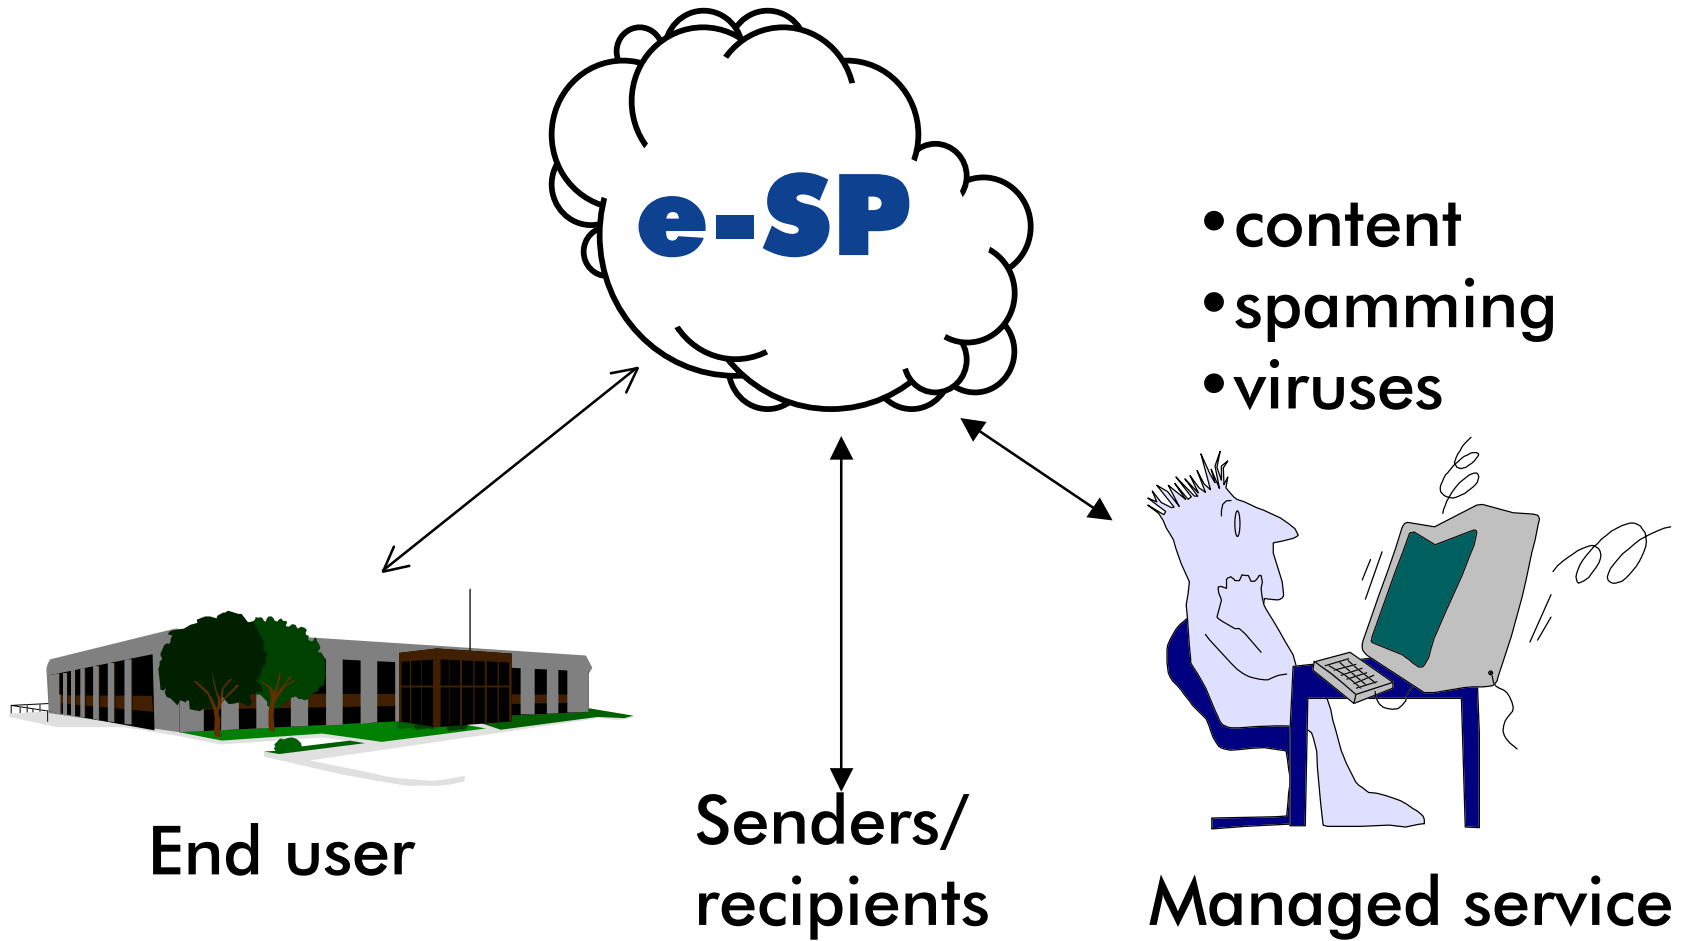

Openmail

Managed Messaging

OpenMail®

Mobile Connectivity

◆ **Web mail now offered as standard by many ISPs**

- Mostly consumer use, not secure
- Professionals want secure web access

◆ **GSM and SMS well established**

- Mobile workers want integration with cellular phone
- SMS allows simple e-mail access
- Bandwidth and coverage increasing
- Demand for full web and e-mail access through phone

◆ **WAP (Wireless Application Protocol) coming along fast**

- 'HTTP for mobile phones'
- Endorsed by leading equipment providers

OpenMail®

The Future...

OpenMail

...Mobile E-Services

OpenMail®

Openmail

Connectivity

OpenMail[®]

◆ In Finland more than 60% of users have cellphones

◆ In the UK the figure is over 50%

◆ All countries are catching up

◆ Finland is driving new mobile services very fast

- you can pay for services, such as car wash, by phone
- future use will include links to home services and supply of electronic cash

Network Speed

- ◆ **E-commerce limited by current narrowband network speeds (9.6 or 14.4 Kbps)**
- ◆ **Wireless data doubling every year**
- ◆ **2nd generation technology improvements will increase speeds to >56Kbps**
- ◆ **3rd generation already planned - expect mobile data speeds >1Mbps**
- ◆ **Network speed then no longer a limiting factor - explosion in use**
- ◆ **E-services available 24 hours on demand**

OpenMail[®]

Impact of Cell Phones

- ◆ **Nokia / Ericsson predict 1 billion cell phones by 2004**
- ◆ **10-15% will be smarter phones with Unified Messaging**
 - equals 100-150 million UM mailboxes in 2004
- ◆ **Ovum predicts 170 million UM mailboxes by 2006**

OpenMail®

Unified Messaging

UM is a strategic convergence point of 3 high-growth communications markets

- Ovum 12/98: "UM will replace the dialtone"
 "UM will be the standard interface to the network"
 "All messaging will become unified within 5 years"

OpenMail[®]

Vision

- ◆ **Smart mobile phones combine voice and data**
- ◆ **Mobile access to internet and e-services through high bandwidth data network**
- ◆ **Permanent connection using data services**
- ◆ **Vast range of applications**
 - financial - on-line banking, share dealing
 - personal - links to home appliances
 - radio tuner - internet radio with global access
 - services - electronic cash, appliances

Personal and application messaging will be crucial in making this work!
