# **What on Earth is HP Netaction's Process Manager, and Why Would I Care?**

**In today's ever more demanding business climate, we need to be able to work in a way that is smarter, more agile, more integrated and more co-ordinated. This session describes Process Management, particularly HP Netaction's Process Manager (formerly known as "Changengine"), covering both business and technical angles. We explain why it's important, and why customers are experiencing enormous benefits, very rapidly.**

**You will learn:**

- 1. What Process Management is**
- 2. Why it's essential in the brave new e-world of e-services and federated enterprises**
- 3. How HP Process Manager works**
